# California Labor Federation Supports Faculty Association Call for One-Day Strike

*Statement from California Labor Federation Executive Secretary-Treasurer Art Pulaski*

"The California Labor Federation fully supports the faculty of the California State University (CSU) system in their call for fairness and justice on the job. Those entrusted with educating our college students to create a better future for all Californians should be treated with dignity and respect. Unfortunately, CSU executives have chosen to give themselves hefty raises while hiking college tuition and reneging on previously negotiated contracts for educators.

"The California Labor movement stands with the California Faculty Association to demand that college is affordable for our state's students and that educators receive the previously negotiated fair pay and benefits for the important job that they do."
