

THE UNITED FACULTY OF WASHINGTON STATE STANDS WITH THE CALIFORNIA FACULTY ASSOCIATION

The United Faculty of Washington State strongly supports our faculty sisters and brothers in the California Faculty Association in their one-day action on November 17. The California State University administration has shown contempt for an independent fact finder, the CSU faculty, and California's students. The faculty are demanding that the university return to its core academic mission and focus its resources on the accessible, affordable and quality education its students need and deserve. We commend and support the CFA for taking a stand against the further privatization and dilution of public higher education.
